SPONSORSHIP PACKAGE

2026 – 2027

OUR MISSION

Assistive Technology is an **interdisciplinary project club** dedicated to designing and building solutions that enhance the lives of people with disabilities. By combining **research, engineering, and software development**, we transform **bold ideas** into **functional products**. As a launchpad for innovation, our mission is to foster collaboration, hands-on implementation, and creativity to turn inclusive solutions into real-world technology startups.

OUR HISTORY

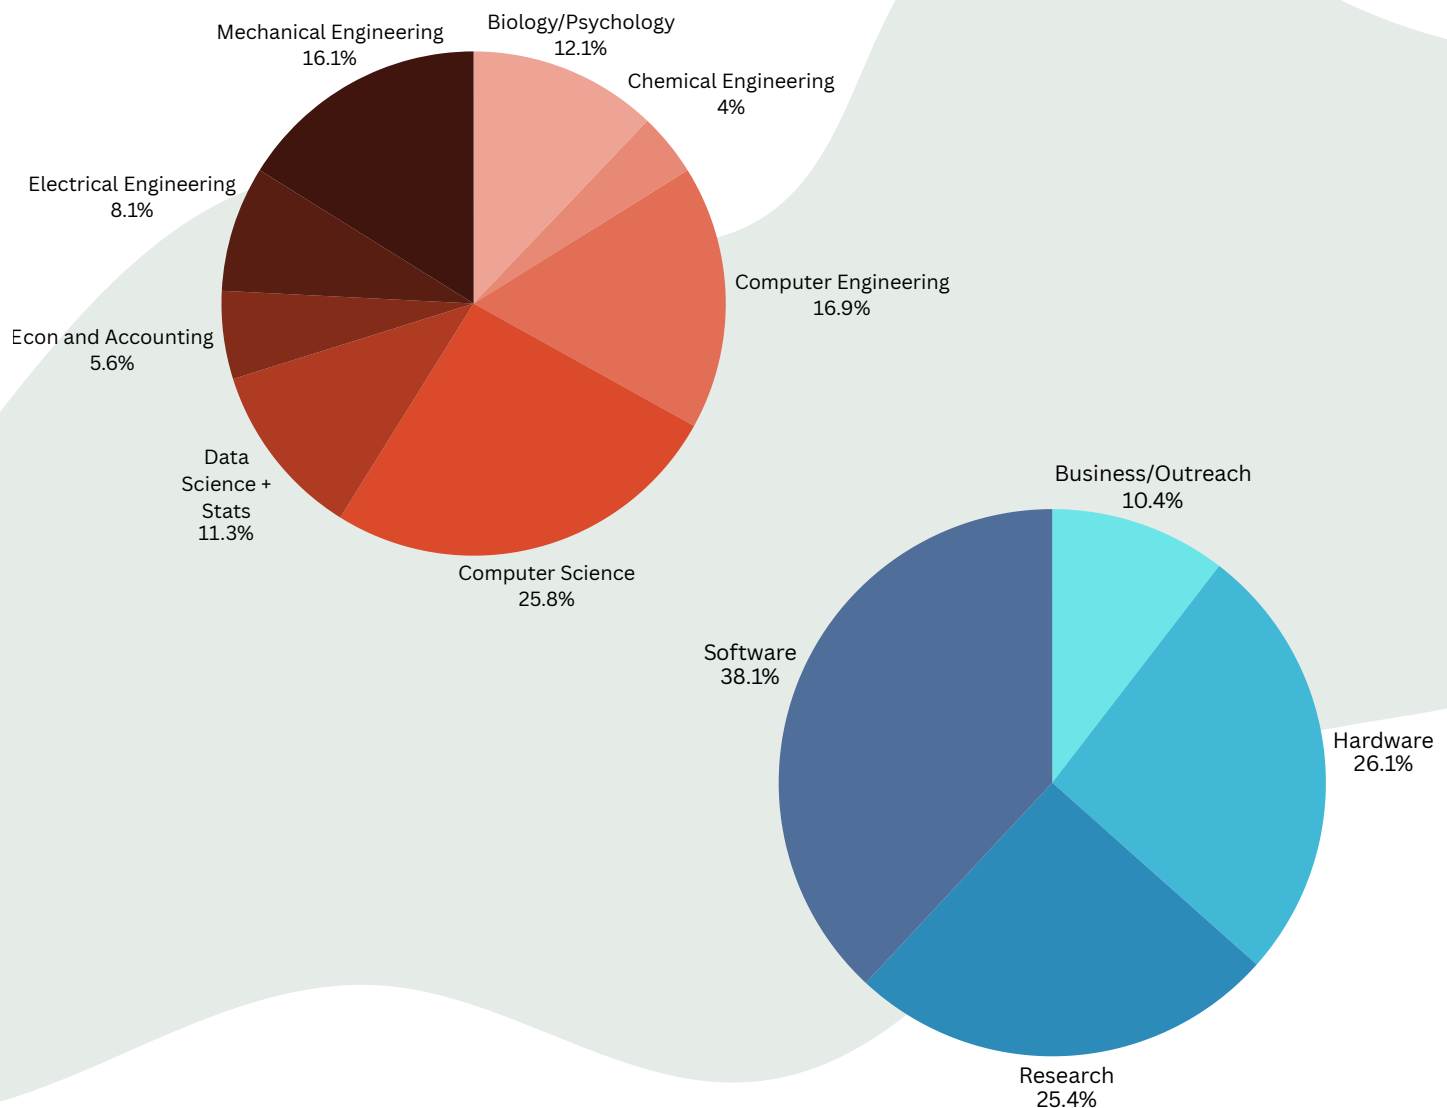

Assistive Technology was founded in Fall 2024 by three passionate students who sought to tackle a gap in Alzheimer's detection. Together, they won the **People's Choice Award at UCSB's New Venture Competition**. The club has since scaled to be a **120+ member organization** in under a year, still seeking to push the boundaries of innovation to develop assistive technologies for people with disabilities.

THE TEAM

Assistive Technology is segmented into four departments: **Hardware**, **Software**, **Research**, and **Business**. With over **120 members**, we offer a diverse number of talented members from **different majors and academic backgrounds**. Each person on our team is integral for driving innovation in our projects.

MAJORS & SUBTEAMS

WHY PARTNER WITH US?

As we are an **independently funded team**, we rely on the generosity and support of our sponsors to continue our research and development. Here are just some of the benefits that supporting our team offers:

RECRUITMENT

Assistive Technology provides access to a number of talented engineers and researchers who have hands-on experience and world-class mentorship from professors at UCSB. Partner with us to connect with passionate and skilled candidates for internships and job openings.

FUTURE ENGINEERS

Your support for our club will ultimately provide the next generation of engineers the opportunity to gain real-world experience outside of the classroom. It is your help that will allow us to bring groundbreaking ideas into reality and bring about the future of engineering.

PRODUCT EXPOSURE

Sponsoring our team not only helps drive our projects, it offers the potential to expose your products as our engineers develop in their professional careers. We will proudly display your logo on our website or our apparel, all giving you the opportunity to gain comprehensive exposure and feedback from our engineers as they transition from school to the workplace.

PITCHFEST

Another opportunity that comes with partnering with us is our **Pitchfest**. It is a yearly on-campus mini-accelerator and demo day where your team can judge, brief, and recruit from our cross-disciplinary talent pool (CS, CE, ME, Bio/Psych, EE, etc.).

BRANDING

Logo on event page/screens and shoutouts in newsletter + social media recap.

TALENT ACCESS

1 judge/tech mentor seat and Right-of-First-interview for top 10% teams.

INSIGHT

2-page post-event coverage including problem spaces explored, quick tech scans and a contact sheet of finalists.

CONTENT

License to use event photos for employer branding.

By supporting us and the development of assistive technologies, you are helping us bring inclusive innovation to those who need it most.

SPONSORSHIP TIERS

Our team welcomes both monetary donations and in-kind donations (equipment, materials, tools, services, etc.).
